

# Official State List of the Birds of Florida

## Florida Ornithological Society Records Committee

This is a list of modern bird species definitely having occurred in Florida by natural appearance or by establishment of an exotic. The base list shall be the Supplement: Checklist of Florida Birds, pp. 255-260 in Robertson & Woolfenden (1992), as updated by final decisions of the Florida Ornithological Society's Records Committee. The following list of 498 species is updated through 12 February 2007. Established exotics (e); extinct native species (x) and disestablished exotics (d); and species listed without verifiable evidence (u) shall be so annotated. Sibling species groups may be included without reference to a particular underlying species but shall not be counted in any total of species found in Florida unless none of the underlying species are on the state list. Species in the list below annotated with an \* should be documented when detected in Florida and submitted to the FOSRC for review. For the two species in *Empidonax* indicated by \*\*, please submit to the FOSRC only those reports that document vocalizations on tape or video with evidence from specimens / hand measured birds. In addition, documentation should be submitted to the FOSRC for any species detected in Florida, believed to have occurred naturally or to have escaped, but not appearing in the main list of the aforementioned publication.
