

**Maine
Bird Records Committee**

Official Checklist of Maine Birds

The Maine Bird Records Committee considers the following 423 species to be positively documented within the state of Maine. The names and taxonomic arrangement follow the American Ornithologists' Union *Check-list* (7th edition, 1998), as amended through its 45th supplement (*The Auk* 121: 985–995, 2003). This list was compiled through 30 November 2005 by the Maine Bird Records Committee.

Hypothetical species. Significant reports for 20 additional species exist for Maine. Although some probably are correct, the committee remains uncertain because we lack conclusive evidence at this time. We plan to review these species in the near future. The Maine Bird Records Committee defines a species in Maine as hypothetical if the record is thought to be accurate, but the supporting documentation is not sufficiently complete to be accepted as a full record. Records in this category usually lack physical documentation, whether by specimen, photograph, or recording, or involve descriptions that are only partially adequate. Uncertainty regarding provenance or accuracy of locality information may also constitute reasons for placing a species on this list: *Barnacle Goose*, *Trumpeter Swan*, *Labrador Duck* (*extinct*), *Greater Prairie-Chicken* (*Heath Hen* *extinct*), *Northern Bobwhite*, *Black-browed Albatross*, *Cape Petrel*, *Black-capped Petrel*, *Audubon's Shearwater*, *Band-rumped Storm-Petrel*, *Thayer's Gull*, *Tufted Puffin*, *Vermilion Flycatcher*, *Gray Kingbird*, *Plumbeous Vireo*, *Black-billed Magpie*, *Eurasian Jackdaw*, *Bewick's Wren*, *Sprague's Pipit*, *Boat-tailed Grackle*.

Failed species. The following introduced species bred for some years in Maine but never became established: *Gray Partridge* and *Monk Parakeet*.

LEGEND

* *Rare* (species name italicized): Written descriptions and, if possible, photographs and/or audio recordings should be submitted for any occurrence of these species in the state. Please send all reports to: Bill Sheehan, 1125 Woodland Center Road, Woodland, ME 04736 (email: me-brc@maine.rr.com), or Peter Vickery, Center for Ecological Research, P.O. Box 127, Richmond, ME 04357 (email: petervickery@adelphia.net).

- B Breeds regularly
- rb Rare, very local, or less than annual breeder
- ib irregular breeder, only one or two isolated records
- xb No recent breeding; over 20 years since last breeding

NOTE: Reports of breeding by any species that is an irregular breeder (ib), that bred historically (xb), or that is not listed as having bred in Maine should be documented. Please send information to the addresses above.

- N1 Introduced and established breeding population
- N2 Populations successfully re-established and breeding in areas of former occurrence
- N3 Domesticated species with feral populations established and breeding in the wild
- † *Extinct*
